Projects

Telegram Form Bot
URL: https://telegram-form-bot.gavrusev.vercel.app
GitHub: https://github.com/alexgavrusev/telegram-form-bot

- Set up a monorepo project structure deployed on a single domain
- Developed a serverless backend
  - Implemented a passwordless login with JWT authentication
  - Designed mongoDB data models with typegoose
- Developed a serverless Telegram bot
  - Used telegraf.js
- Developed a Next.js frontend
  - Enabled experimental React Concurrent Mode to increase performance
  - Fetched data with react-query and Suspense
  - Implemented optimistic UI updates with rollback on failure
  - Created the UI with material-ui
  - Developed a service worker for static asset caching, offline fallback page and the ability to Add to Home screen
- This project can now be used in my other freelance websites, if the client wants to receive Telegram notifications from form submits

My portfolio
URL: https://gavrusev.dev
GitHub: https://github.com/alexgavrusev/portfolio

- Used Gatsby
- Minimized and monitored bundle size using Preact and webpack-bundle-analyzer
- Set up self-hosted preloaded fonts
- Managed content through Contentful CMS
- Created a pixel-perfect 8px grid layout with chakra-ui and capsize

Trichologist consultation scheduling
URL: https://trichologist.gavrusev.vercel.app
GitHub: https://github.com/alexgavrusev/trichologist

- Designed and Developed the website in a span of 1.5 weeks
- Implemented animations with framer-motion

Tea ceremonies arrangement

URL: https://tea-club.gavrusev.vercel.app

GitHub: https://github.com/alexgavrusev/tea-club
